Subject: Comments on Docket Number (CWA-09-2021-0021)

Mr. Steven Armsey,

My name is (b) (6), (b) (6).

My comments on docket number CWA-09-2021-0021 are as follows: I believe the respondent continues to violate Sections 301(a) and 402 of the CWA, 33 U.S.C. § 1311(a) and 1342, by discharging pollutants in storm water to Keehi Lagoon. On numerous occasions I have seen the workers at this facility collect water from pressure washing operations in totes. This water is then distributed across the marina parking lot where it drains in to the ocean. Additionally containment is not being used during sanding and grinding operations involving marine antifouling paints containing heavy metals. This dust can be found on the decks of boats docked in the harbor so it can be assumed it is making it into the water. Also painting operations are occurring with out proper containment. (b) (6)

(b) (6)

I recommend continued close monitoring and inspection of this site as well as random inspections to include after house as much of the improper activity occurs in the evening and weekends when they know they can get away with it.

V/R
